

Archaix 2.0 Composite Chronology exhibits 62 dates involving 300 events in linear timeline combining the Phoenix and Nemesis X Object appearances, the Mayan Long-Count baktuns and the Anunnaki NER 600 year periods, a history spanning over 74 centuries to May 2040 and November 2046. BONUS: Not on the chart are 21 additional dated events of things occurring in the world at key times within the 4 listed timelines.

This analysis begins with the year 5239 BC. It is entirely a human chronology, no matter where these humans came from. This thesis serves to demonstrate that the ancient calendars we have today were initiated by events connected to and as a result of, the Nemesis Cataclysm.

The first chronomarker in this study is from 5239 to 4639 BC, a 600 year period. 600 years is a long period of time, a lot can happen. 600 years ago was the year 1422 AD, when less than 1% of the world's population could read and 90% of the people alive had never ventured more than 5 miles from the place of their birth. It was 185 years BEFORE the Pilgrims landed on Plymouth Rock to found the English colonies in North America that would become the United States. 1422 AD was 354 years before the Declaration of Independence was signed. It was 443 years BEFORE the Civil War ended in 1865. It was 481 years before Orville and Wilbur Wright at Kitty Hawk successfully demonstrated manned flight in 1903. It was 541 years before the assassination of President John Kennedy and 569 years before the Internet.

600 years is a very long time. In just 200 years we went from horse and buggy to cellphones, from coal-burning stoves to nuclear reactors. And the history of our world is complex and much evidence exists that we have been technologically advanced a few times in the past.

We have a lot of ground to cover. After each chronographical section I will provide you a summary. We are going deeper than any historical analysis you have ever partaken in.
